AERO RACE JERSEY 5.1, 2018

04.

06.

2019 may appear at first to be an evolutionary rather than revolutionary season. We didn't invent the next game changer like the Gabba, but there are numerous details in this collection that make a huge difference. Innovations that come from Team Sky riders, from the extensive aero project we're undertaking together with the Norwegian University of Science and Technology, and especially from Castelli staff tearing up the hills around our HQ in the Dolomites. The sources of inspiration are endless.

AS YOU LEAF THROUGH THIS CATALOG, YOU'RE LOOKING AT THE FUTURE OF CYCLING CLOTHING.

THE ULTIMATE RACE SUIT

The Sanremo Speed Suit revolutionized the way pro riders dress when we invented it back in 2011 and we're still surprised that every other manufacturer has simply copied the Sanremo front opening rather than trying to come up with something original. While the front opening is the most visible part, we've worked on every other detail to make this the perfect race suit. It's aero thanks to our CFD based seaming and wind-tunnel selected fabrics. It's comfortable thanks to the body fabrics that will keep you dryer and cooler than some of the simple Lycra fabrics used by some other companies. The lower portion of the suit is our Free Aero Race 4 bibshort, our most comfortable suit for your longest, toughest race days. Besides the new fabrics and seam placement we've also worked on the pockets to make them better for racing. They're somewhat narrower for better aerodynamics but there are now 2 big pockets instead of 3 small ones, so they're easier to access in racing.

ROSSO CORSA

SANREMO 4.0 SPEED SUIT 4519001

SIZES: S-3XL	RACE FIT
WEIGHT: 285g (Large)	BREATHABILITY
15°-35°C / 59°-95°F	LIGHTWEIGHT

PROGETTO X²

- CFD-based fabric placement and seam construction
- Engineered for aero efficiency at 30 to 55 km/h
- Airflow shoulder construction
- Velocity Rev2 fabric on front and sleeve
- 3D mesh back for breathability
- Elbow-length stretch sleeves with raw-cut edge
- YKK® Vislon® zipper
- 2 pockets with floating design for more space in pockets
- Vortex fabric on legs for aero performance
- Forza fabric on inner legs with 38% Lycra® content for perfect fit
- GIRO® leg gripper elastic for better grip distributed over larger area
- Doppio V construction in front for increased support and comfort
- Progetto X² Air Seamless seat pad

FROM
THE SECRET
SPEED LABS

Our speed suit project is permanently open, and we believe that we're going to continue to see significant gains over the coming years. The Body Paint 3.3 version is the result of CFD modeling followed by extensive pattern engineering and fabric research, then further testing in the wind tunnel and on the road. The back is in an open mesh that we chose because the wind tunnel said it's the fastest, but as a bonus it keeps you cool as well. Same with the leg endings, which incorporate a mesh that keeps you cool while inducing a bit of turbulence into the boundary layer.

MEN'S SHORTS

BIBSHORT CHART

THE RIGHT SHORTS MAKE A DIFFERENCE

When it comes to performance cycling, whether it's long weekend rides, road races or granfondos, bibshorts are where it's at for outright comfort. A perfect pair of bibshorts will provide just the right balance of comfort and support for your legs when you're pounding out those kilometers.

PROGETTO X² SEAMLESS X²

Pro-level seat pad for maximum comfort. New seamless skin-care layer is softer against the skin and reduces abrasion. Separate saddle-shaped cushioning layer with progressive damping through high-density foam and gel inserts.

KISSAIR²

High-performance seat pad for all conditions. Single-piece construction with infinitely variable thickness. Updated for 2019 with more supportive padding and a softer, stretchier fabric next to the skin.

EVERYTHING
WE KNOW
ABOUT
COMFORT

This short is the result of decades spent working to make long hours in the saddle ever more comfortable. The fabric is our high-stretch Forza fabric. The 38% Lycra® content means that it's gently compressive while never binding. And it maintains an insanely soft hand. The nearly seamless construction is derived from our Body Paint shorts, which debuted a decade ago and started the trend of reduced seams while maintaining remarkable fit. Nothing to rub or break. The renowned Progetto X² Air Seamless seat pad gets an update in this season with a new skin care layer that features a remarkably soft new surface fabric and more stretch, which allows us to eliminate the front triangle. We also obsessed over every other little detail, like the new bib construction and even new silicone logos that stretch with the base fabric and recall the logo location of the first Castelli Aero Short from the late '70s, the short that started it all.

FREE AERO RACE 4

Team Sky | Diego Rosa

OUR NO-COMPROMISE APPROACH TO CREATING THE BEST CYCLING CLOTHING IN THE WORLD IS NOWHERE MORE EVIDENT THAN IN THE 2019 FREE AERO RACE 4 BIBSHORT. THIS IS A PRODUCT THAT'S UNDERGONE 12 YEARS OF DEVELOPMENT AND REFINEMENT, WITH LITERALLY MILLIONS OF KILOMETERS ON THE ROAD.

The Free Aero Race short is the all-around race short we supply to Team Sky, as well as all race teams we've sponsored since 2007. But that's not enough of a reason for you to just go out and buy a pair. Since these guys ride over 30,000 kilometers per year, we consider them ideal testers and continuously solicit their feedback. The difference is that we actually listen to them. And the good thing for you is that the pros are looking for comfortable shorts too, so this short is made to be minimalist and fast, but without sacrificing all-day comfort.

FOR THIS YEAR WE'VE MADE SUBTLE BUT IMPORTANT REFINEMENTS. THE SEAT PAD HAS BEEN UPDATED WITH A SOFTER, STRETCHIER AND TOTALLY SEAMLESS TOP LAYER. THE LEG GRIPPER IS ALSO STRETCHIER AND GRIPS BETTER YET ALLOWS FOR A BETTER-QUALITY SUBLIMATION PRINT. THE BIB STRAPS ARE BOTH LIGHTER AND MORE COMFORTABLE WHILE GIVING BETTER SUPPORT.

OUR WEAR TESTERS ARE SAYING THIS IS THE BEST FREE AERO RACE YET.

The Inferno is our premium-level race short made specifically for hot weather. Designed to keep you as cool as possible, it has a perforated fabric on the side panels and mesh-like GIRO Air leg bands, and the fabric on the front of the short actually includes titanium dioxide (the active ingredient in sunscreen) to help reflect UV rays and keep you cool. You see the pros from Team Sky wearing this short in all kinds of conditions because it also happens to fit extremely well and is one of the most comfortable shorts they've ever worn.

MADE TO GO THE DISTANCE.
QUICKLY.

Velocissimo is Italian for fast, very fast. But this short is focused on comfort, so it'll just seem like you get there faster. We've given it an anatomical shape that moves stitching away from areas that can annoy you, and we've even managed to completely eliminate the leg-ending elastic band by borrowing technology we developed for the Premio short. The KISS Air² seat pad is the choice of some of the Team Sky riders, so you know it'll stand up to your 200km rides.

ON THE PODIUM

Only one rider gets to cross the line first. In our race short line-up, of course, that's the Free Aero Race. But this Volo short was made to be a close runner-up. Volo, as in Italian for "I'm flying," is meant to be the workhorse of race shorts. It's got outstanding fit, our excellent 200+ gram Affinity Lycra®, the updated KISS Air² seat pad that's the choice of a number of our pro riders, and the exceptional GIRO Air leg gripper. For the race short podium, it's a photo finish.

ENGINEERED
FOR PERFORMANCE

While this short sits at the entry level of Castelli's shorts range, it's engineered with top-level performance. It starts with the Pro Dry Soft two-layer fabric that knits a polyester inner layer with a nylon outer layer for exceptional moisture management and durability. Then the side panel and leg ending are extra stretchy for exceptional fit. The KISS Air² seat pad is the choice of some of our pro athletes and even sees duty at the Tour de France. Consider this short not as an entry-level short but as your entry to real comfort.

MEN'S JERSEYS

AERO RACE 6.0

LOOK BACK AT PHOTOS OF PRO RACING PRIOR TO 2009 AND YOU’LL NOTICE HOW MOST OF THE RIDERS WERE WEARING JERSEYS THAT WERE TOO BIG. A FEW RIDERS WOULD SIZE DOWN FOR A BETTER FIT, BUT NO ONE WAS ACTUALLY LOOKING AT AERO ADVANTAGES FOR ROAD RACING.

Our inspiration for the first Aero Race Jersey came when Zipp added dimples to their 404 wheel, claiming a 4-watt savings. So we thought, why not bring that idea to a jersey? We didn’t really know how to do that back then, so we reached out to some experts. A Ferrari engineer shot down the idea, saying, “Aerodynamics doesn’t really matter at anything less than 200 kilometers per hour.” Undeterred, we persisted. When we tested our first Split Second Jersey we were surprised to see a 12-watt savings at 40 kilometers per hour compared to the jerseys pro cyclists were wearing at the time. 2009 was the year everything changed. Cervélo TestTeam led the world rankings while being a second-division team. And every other team scrambled to get aero jerseys from their clothing supplier. And soon the rest of us were wearing better-fitting and faster jerseys too.

THIS IS OUR SIXTH MAJOR GENERATION OF THE AERO RACE JERSEY. FIRST AND FOREMOST IT’S A RACE JERSEY THAT HAS TO BE COMFORTABLE FOR LONG HOURS ON THE BIKE. IT DOESN’T COMPROMISE ON COMFORT, CARGO SPACE OR MOISTURE MANAGEMENT. EACH SEAM IS PLACED BASED ON CFD ANALYSIS, AND EACH FABRIC IS CHOSEN BY HOW THE AIR MOVES OVER THE BODY.

WHILE THIS IS OUR MOST AERO JERSEY TO DATE, IT’S ALSO OUR MOST COMFORTABLE AERO JERSEY EVER. READY TO BE WORN AT THE TOUR DE FRANCE OR WHILE YOU CHASE YOUR NEXT STRAVA PR.

AERO RACE 6.0 JERSEY FZ 4519009

SIZES: S-3XL	RACE FIT
WEIGHT: 159g (Large)	BREATHABILITY
18°-32°C / 65°-90°F	LIGHTWEIGHT

- CFD-based fabric placement and seam construction
- Engineered for aero efficiency at 30 to 55 km/h
- Airflow shoulder construction
- Velocity Rev2 fabric on front and sleeve
- 3D mesh back for breathability
- Elbow-length stretch sleeves with raw-cut edge
- YKK® Vislon® zipper
- Drop tail allows perfect pocket placement while keeping jersey fitting well at waist
- Reflective piping

THE FIRST AERO JERSEY PROJECT WAS CALLED SPLIT SECOND

When Castelli engineered the first aero jersey for road racing back in 2006, everyone thought we were crazy. Back then, aero was only for TTs. Performance clothing meant moisture management. And you could win the Tour de France with a baggy jersey that was little more than a polyester T-shirt. Even our aerodynamic consultants expected limited gains, so we named the jersey Split Second, though, like now, we thought even small gains were worth pursuing. In the end the gains were pretty substantial, and we completely revolutionized the look of the pro peloton.

We're now on the sixth major revision of our aero jersey. Each generation has become more aero and better fitting. The Aero Race 6.0 benefits heavily from CFD analysis of wake flow in the riding position for fabric and seam placement. It also benefits from Team Sky riders' feedback, as we've worked to make the jersey comfortable for their long hours of training and then racing in every possible weather condition.

Version 6.0 is our most aero and most comfortable Aero Race Jersey yet. But we're already at work on 6.1...

IT'S LIKE
A CLIMBER
WINNING
THE GREEN
JERSEY

When we created this jersey we primarily focused on making it light for the big alpine climbs as well as cool for hot days. A real Tour de France jersey if there ever was one. But we didn't want to completely ignore aerodynamics, so we used patterning similar to our Aero Race 5.1 Jersey, which we knew was fast. The resulting jersey is extremely cool and light and instantly became a favorite with our pro riders. The surprise was when we put it in the wind tunnel. This lightweight jersey posted aero drag values just 2 watts slower than our Aero Race 5.1 jersey. Next time they ask you if you want aero or light, just answer, "Yes, please."

FREE AR 4.1 JERSEY FZ 4519011

SIZES: S-3XL	RACE FIT
WEIGHT: 123g (Large)	BREATHABILITY
18°-32°C / 65°-90°F	LIGHTWEIGHT

- Saves approximately 12 watts at 40 km/h compared to a normal race-fit jersey
- Velocity dimpled fabric on front and shoulders for improved wicking and faster drying
- Full-length YKK® Vislon® zipper with neck protector
- Nervato fabric at armholes for improved aerodynamics
- Silicone gripper elastic at waist
- Mesh raw-edge arm grippers
- Zippered rear pocket
- Reflective heat-transfer viz strips

BLACK/DARK GRAY

ONE FOR ALL

This jersey is an evolution of our top pro racing jersey from just a few year back. It's also our first aero race jersey that didn't get retired when the next generation of faster, more aero jerseys came along. The Aero Race 4.0 Jersey was very fast but also an amazing mix of classic good looks and a stretchy fit that works on a lot of body types, not just the skinny racer. For the 4.1 version we've taken it a different direction, away from pro racing, by giving it the convenience features that seemed superfluous when we designed the 4.0 to win the Giro d'Italia. This updated jersey gets a zippered rear pocket, a flap behind the zipper to protect your neck, updated Velocity dimpled fabric on the front and an angled pocket for easier access. This makes it the one ideal jersey for all your rides, whether you're sprinting for the win or trying to survive the Sunday group ride.

PERFORMANCE
IN EVEN RICHER FABRICS

We’ve taken our favorite Aero Race 4.1 Jersey and made it richer by producing it in dyed fabrics rather than the usual sublimation printed fabrics. This gives deeper, more saturated colors while avoiding the shiny look that inevitably comes from the high heat and pressure of sublimation printing. You still get the great fit, great comfort, great moisture management and great aero performance from the race background of this jersey. Look smart; go fast.

DARK STEEL BLUE/RED

ESPRESSO JERSEY

We applied the Espresso name to a winter jacket a few years ago mostly because it sounded fast and Italian, without really thinking how a perfectly pulled Espresso is a work of art, something apparently so simple but at the same time the result of painstaking attention to the details. That’s the thinking behind the Espresso jersey. Simple and clean looks on the outside but careful attention to the construction, from our new Punto fabric with exceptional softness and breathability to the front zippered pocket for your cash and credit card. We invented a new rear pocket construction that lays flat but can bellow out for high carrying capacity when needed. In fit and finish this jersey is designed to complement the Premio bibshort.

LIGHTER AND BETTER

The inspiration for this jersey came while riding Switzerland’s Flüela Pass between Davos and the Engadin Valley. The air is thin as you approach this 2383m pass, and I was pushing hard on a 230km ride. I could hear the winding engine of the super-car coming up the valley, and before it reached me I could actually feel the rumble as it approached redline. That Lamborghini Superleggera was a road-going version of Formula One technology, and this jersey represents the same concept. Here we are using technologies and know-how developed for the highest levels of pro racing, adapted into an extremely lightweight and aero road-going jersey. We’ve used bits of our 50g stretch woven fabric, our ultralight and ultra-wicking Futura 50g fabric on the front and sleeves, and a 3D mesh fabric liner on the back to support the pockets, and added a handy zippered key pocket for some creature comforts.

APPLIED SPEED

Think of the Volata Jersey as the everyday aero jersey. We’ve taken the fabrics from our fastest aero race jersey ever and used a cut that gives us most of the aero benefits while not being extreme. The Velocity fabric provides excellent wicking, while the little details like the mesh sleeve endings, the jacquard elastic in back, and the fourth zippered pocket make this jersey a staff favorite for everyday riding.

PROLOGUE OR PRO LOGO

The Prologo name is Italian for “prologue,” the opening salvo in a Grand Tour. But many of our customers pronounce it like “Pro Logo.” And we don’t mind at all.

The Prologo Jersey, now in its sixth generation, does feature a big logo, but more than that it brings a lot of tech directly from our experience with pro racing. The fabric is remarkably soft yet stretchy and features bioceramic nanoparticles added to the fused polymer, which reflect far infrared light to both protect you from hot sun and help the body keep itself warm.

The construction also borrows a lot of cues from pro racing: the same drop-tail construction that helps the jersey sit right around the waist while allowing generous pockets that sit lower on the back, the wraparound side panels that ventilate the back without letting in too much air from the front, and the easy-sliding YKK® Vislon® zipper.

IT NEVER GETS EASIER;
YOU JUST GO FASTER

We've incorporated a lot of our pro racing technology into this all-around performance jersey. The base fabric is a textured 100% polyester that provides excellent wicking to keep you dry in a wide range of conditions. We've wrapped our Air Mesh fabric around the shoulders and down into the sleeves and side panels to give extra stretch so the jersey doesn't constrict or make you look like you should have bought a size larger.

CREATIVELY FAST

The Tabula Rasa Jersey can be thought of as our Aero Race Jersey, but in a cut made for everyday riding and with a few construction details that allow for maximum creativity in printing all over the jersey. It has reduced seaming and a simplified cut so that the graphic designers have maximum flexibility when adding a print to this jersey. But it doesn’t skimp on details. The jersey features the same ProSecco Micromesh fabric that we use in the Giro d’Italia and Maratona dles Dolomites jerseys, and the same zipper and drop pocket construction found on Team Sky’s race jerseys. Also available in our Servizio Corse custom clothing program, where you can add the graphics of your team, club, shop or company to Castelli’s best products.

MULTICOLOR BLUE/ORANGE

ALL-OVER PERFORMANCE

With the Tabula Rasa bibshort we set out to create a performance short that allows for all-over printing for maximum creativity in the graphic design. It had to be a no-compromise short, one that we would take for our longest rides. Along the way we found we still need a durable dyed nylon insert for the saddle contact areas but the rest of the short is all printable, but all performance as well. It features our ProFit Lycra® fabric for optimum compression along with our Kiss Air² seat pad and Giro3 gripper elastic. Also available in our Servizio Corse custom clothing program, where you can add the graphics of your team, club, shop or company to Castelli’s best products.

PRO - LEVEL BASE

The pro cyclists we work with know the importance of the right base layer for the conditions. The Pro Mesh is made for the widest range of conditions and is designed to keep you dry in cool to mild temperatures. We'll even put it under a Flanders Warm base layer in the coldest conditions. We've given it a graphic print so you can show off that you have something special when you open your jersey zip.

WARMER CONDITIONS

This is our base layer for the warmest conditions. The mesh is open to create a space on the skin for sweat to evaporate. The 10% elastane content makes it very stretchy and helps in the moisture retention so that you're always getting evaporative cooling.

DRY IS GOOD

This is the piece our pros requested for those inbetween conditions where the Flanders is too warm and the Core Mesh is too cool, like Spain in February or Belgium in April. You’re not looking for warmth from your base layer, just something to move the moisture away from your body and help your race jersey perform. Our 3D mesh fabric creates dead air space next to your skin, while the polyester capillary action moves sweat away.

EXTENDED USEFULNESS

The Prosecco base layers are our mid-weight option and are made to wick moisture away from your body while adding a moderate amount of insulation. This all-around base layer can be used under a short-sleeve jersey to extend the comfort range to those first cool fall days, or even under a full jacket for your intense cold-weather training sessions.

CASTELLI DAMPING SYSTEM
FOR MAXIMUM COMFORT

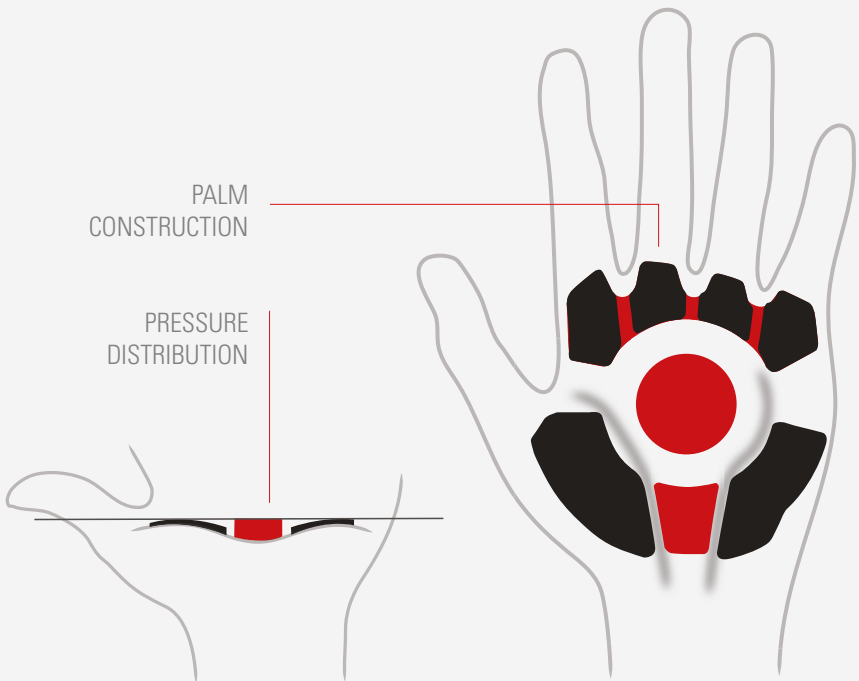

The Rosso Corsa Pro glove features CDS padding for comfort and control. We engineered crash protection into the palm and wrapped it around the side of the hand, using a highly abrasion-resistant material. The back of the hand and the cuff are in high-stretch material to make the glove easier to get on and off. Bold graphics and reflective piping on the back of the hand are clean and give the glove a refined technical look. This glove is perfect for anyone who appreciates extra padding on the palm, or for your next adventure on the pavé.

The Castelli Damping System was designed and engineered to address a common problem many riders suffer from: discomfort and occasional numbness in the hands associated with extended periods of time gripping the handlebar. We carefully mapped key parts of the hand in order to create optimal protection from steady road vibrations. The result is our unique palm construction that features a combination of protective materials and cushioning foams. The Castelli Damping System is applied across many styles in our glove collection and provides outstanding control and comfort during training or racing.

LIGHTNESS GLOVE 4510529

SIZES: XS-2XL	WINDPROOFNESS
WEIGHT: 47g (Pair)	WATERPROOFNESS
10°-18°C / 50°-64°F	INSULATION
	BREATHABILITY
	LIGHTWEIGHT

WEATHER CONDITIONS

- Back in Thermoflex for stretchy warmth
- Palm with great touch and durability

WARM HANDS
IN COOL CONDITIONS

Just a single layer of our Thermoflex fleece on the back of the hand brings extra comfort to a wide range of conditions. You'll reach for the Lightness on those mild days when you could get by without gloves, and they will keep you warm enough in cooler conditions when you think you need more significant protection. And best of all, they're small enough to pack along just in case.

DILUVIO C GLOVE 4517524

SIZES: SM/LX/2XL	WINDPROOFNESS
WEIGHT: 99g (Pair)	WATERPROOFNESS
5°-16°C / 41°-61°F	INSULATION
	BREATHABILITY
	LIGHTWEIGHT

WEATHER CONDITIONS

- 3mm neoprene insulation to keep your hands warm in wet conditions
- Grip print on palm
- Extended neoprene cuff to keep the wind and rain out

A WET SUIT
FOR YOUR HANDS

We developed this glove based on gloves used for scuba diving in cold water. Just like with a wet suit, your body heats up the bit of moisture inside the glove and you stay warm. We gave grip to the palm, adjusted the fit, and chose an extremely high-quality neoprene that's incredibly stretchy. It's not enough for super-cold rain days, but for moderate and rainy conditions it's ideal.

- Castelli's Fast Feet project – for road racing in cool and wet conditions
- Aerodynamic, windproof, waterproof
- Silicone-coated smooth waterproof stretch fabric
- Step-down trip strips on side of leg help detach airflow
- Seam sealed to keep water out
- YKK® rear zipper
- Reflective details

010
BLACK

Castelli's Fast Feet project: aerodynamic foot coverings for every condition. The road shoe cover is made for racing and training in cool conditions and combines aerodynamics with full wind protection and good water protection. The silicone-coated stretch fabric smooths airflow over the feet while keeping out wind and rain. The ankle seam is taped to further enhance water protection, while the cuff has a silicone bead to prevent water from entering from the top. It's not insulated, so it's not made for cold conditions, but from 8 °C/45 °F and up it offers good protection while maximizing aerodynamics.

- Castelli's Fast Feet project – for time trials
- Developed with Team Sky for the fastest foot covering for time trialing
- Silicone-coated stretch fabric over the shoe smooths out airflow
- Engineered grooved Lycra® in the ankle portion helps detach airflow
- Flat polyurethane tape at the top to keep shoe cover in place

010
BLACK

Castelli's Fast Feet project: aerodynamic foot coverings for every condition. The TT shoe cover is designed for maximum aerodynamics in time trialing, within the limits of the UCI rules. We developed it through CFD analysis followed by extensive fabric and on-bike wind tunnel testing. The smooth silicone-coated foot portion smooths out the shape of the foot, while the grooved leg portion helps detach the air as it flows around the leg. The shoe cover is cut high, reaching to the calf. There's no reason not to wear it on the road, but its gains are maximized at TT speeds.

Double-sided silicone grippers to keep the warmers in place
Ankle zips (leg warmers)

MORE FLEX, MORE NANO

Our Nano Flex warmers have been in our collection for seven years, and we’ve finally found a way to improve them. We’ve added an insert on the back in Nano Light fabric to help them bend around your elbow or knee better while keeping all the water protection. More comfort due to more flexibility, and in a slightly more compact package.

WEATHER CONDITIONS

Themoflex soft fleece fabric
Cross-wrap cuff at bottom
Leg warmer can be put on and taken off over shoes
Gripper elastic at top

GETTING IT RIGHT

The Thermoflex warmers concentrate on getting everything just right. The fabric is extra warm and stretchy, the fit eliminates any extra fabric, the silicone gripper at the top prevents the warmers from falling down, and the cross-wrap cuff at the bottom gives a touch of extra comfort.

UPF 50+ protection
Polyester based for excellent moisture management
Double-side silicone elastic at top for excellent grip

SURPRISINGLY USEFUL

We can officially only rate these warmers at UPF 50+, but in our laboratory tests they actually blocked 99.8 percent of damaging UV rays. We used a polyester base that is not only more effective than nylon at blocking UV rays but is also much better at keeping you dry, which means these arm sleeves are better in both cooler and warmer conditions. We’ve kept the construction very clean to eliminate seams that can rub, and we used our double-sided silicone elastic to make sure they stay in place. They fold up extremely small, so they’re great to stick in your pockets for your next big mountain day.

OVER-ENGINEERED
SIMPLICITY

We wanted to make a cycling cap that's great in dry weather yet can protect in case of rain. The trick is a patented system in which the windproof, water-repellent front panel can fold back for complete breathability or fold forward to protect. Better yet, you have three ways to wear it: with the protective panel folded back, moderate breathability with the cap turned around backward, or full close. The Pertex® fabric is ridiculously thin to fit under the helmet, yet has enough air permeability to prevent you from wetting out as you would under a non-breathable cap.

PRO DEVELOPMENT

It was the pros who first asked for something that's not as hot as the Gabba but warmer than a Perfetto Vest. So we started from the Gabba and made the back in Nano Light Pro fabric — the same fabric as our Nano Flex tights but without the brushed fleece inside. This gives the jacket a lot of breathability and keeps you from overheating inside. We further lightened it up by using a lighter weight of Windstopper® (a full 25% lighter than the one used on the Gabba) on the front.

You may think that this is filling a very small niche. But just try it. It can cover most of the conditions of the Gabba (except wet racing and very cold), yet it handles warmer temperatures better. And the fit is exceptional, which is one more reason you'll keep reaching for it. The consensus of our Castelli test crew is that this piece doesn't fully replace the Gabba or Perfetto Vest, but it's another arrow in your quiver that is ideally suited to cool temperatures, especially when it's dry or there's a risk of light rain.

With all the Gabba copies out there, it's amazing how many pros still buy the real Gabba. This is the third generation of the garment that launched an entirely new category, what some magazines are trying to call the "rain jersey" but the pros just call the Gabba. We've slightly tweaked the fit and improved the drop tail and pockets, but otherwise we've kept with the winning formula of warmth, breathability and water repellency. The Gabba is the centerpiece of the Perfetto family of foul-weather race equipment products.

YES, IT'S THE REAL GABBA

THE PERFECT JACKET?

This jacket was initially created as a long sleeve version of the Gabba -- kind of a cold weather version of the Gabba. But we kept hearing so many people refer to the long-sleeve version of the Gabba as "perfect," so we've renamed it the Perfetto Long Sleeve. It's a great piece in cool conditions with just a light base layer, or it goes to very cold conditions if you add an extra layer or 2 or 3. We've improved the water-repellent finish so it will keep you drier without affecting breathability. We've refined the fit. We've laser cut the drain holes in the pockets. And we've totally redone the splash flap on the back to make it lie flatter and fit better. The reflective logo back there keeps you visible.

Team Sky | Salvatore Puccio

PERFECTLY VERSATILE

The convertible Peretto is the jacket that can do it all. With the sleeves attached it provides full protection in cold conditions, but it turns into a Gabba-style short-sleeved jersey/jacket in mild conditions when you pull off the sleeves. It's perfect as a travel piece because you can ride in nearly all conditions with this jacket. If you're just starting to explore the Peretto family of products, this is your all-conditions jacket.

PERFECTLY PROTECTIVE, PERFECTLY AERO

The Perfetto name is very apt for this vest. Meaning “Perfect” in Italian, we’ve engineered every detail to make it just right. We made the front a little bit thicker to make sure it’s warm enough. And of course we made it windproof on the front but with the high breathability Gore® Windstopper® on the front and free-breathing Nano Flex Light on the back, you’ll avoid overheating. But if the weather warms up we made it compact enough to easily fit in half a pocket. Both the front and the back are highly water resistant so they’ll keep you mostly dry if you get caught in a bit of rain. It’s safe thanks to the reflective piping, and with the close to body fit, it’s the perfect temperature range extension for your Aero Race jersey.

- GORE-TEX® SHAKEDRY™ 2-layer ultralight waterproof breathable fabric
- Stretch Gore water- and windproof inserts at elbow, shoulder and side panel
- Stretch wrist closure eliminates flapping fabric yet facilitates ingress/egress
- YKK® Vislon® waterproof zipper
- 2 external rear pockets
- Silicone elastic waistband
- Fully taped seams for total waterproof construction
- Reflective trim
- Packs up small to easily store in jersey pocket

Light, packable, highly breathable, durably waterproof and aero fitting. This is the first piece that brings all those features together into a jacket made for the rider who has to (or chooses to) ride in any weather conditions. When GORE-TEX® introduced SHAKEDRY™ technology two seasons ago, we immediately saw the opportunity to make waterproof jackets lighter than ever. And then we tested it and realized that we're also able to make them more breathable than ever. Now, thanks to Gore's new Topo inserts we're able to bring a close fit and extreme packability to a jacket that's fully protective for all-day riding in the rain. We've given it two external pockets so you don't have to unzip to reach your jersey pockets. We've given it a longer tail to shield you from the spray coming off your back wheel. We've given it a soft neck liner. And we've given it reflectivity for safety. Compared to our Idro 2 jacket, this is more of a workhorse jacket. It's made for the rider who leaves his house for an all-day ride in the rain, for the rider whose jacket is a necessity and not a piece that stays in a pocket until it's needed.

010
BLACK

THE SMALLEST, LIGHTEST GORE-TEX® JACKET

This jacket can change the way you ride. It's so small you'll find yourself stuffing it in your pocket for rides with even a remote chance of rain, just because it takes up so little space. And you'll be extending your rides into conditions when rain is in the forecast because you know you'll be perfectly covered. Using Gore's newest SHAKEDRY™ two-layer fabric, we constructed the most minimalistic jacket that still covers your needs. It fits over your jersey and vest. It covers your tail. It has a tall collar. It has a YKK® Vislon® waterproof zipper. It has reflectivity. But that's about it. Compared to the Idro Pro jacket, this one is made to go in your pocket for every ride, yet still provide the essential protection when called into duty.

WHEEL SPRAY
NO PROBLEM

If you’re riding without fenders you know that the lower legs get wheel spray from both front and back and are one of the hardest spots to keep dry. So we made the lower part of this leg warmer with waterproof reflective fabric so that the spray will just run off. You wear this warmer with your favorite shorts, underneath the Tempesta 3/4 pant, and OVER your waterproof booties. You get ventilation under the pant, and because the warmer is placed over the bootie, the rain just runs right off. The large reflective area on your moving legs is highly visible for extra safety, and in our testing this piece has become a favorite for night rides.

- 3 rear pockets with Gabba-style tail
- YKK® Vislon® zipper
- Seam sealed for waterproofness

085
LIGHT BLACK

We made this as an aero rain jacket for Team Sky. The high-stretch fabrics with a smooth face make this our most aero race option. But it’s good for so much more: it’s packable and fits in a jersey pocket, it’s fully waterproof and seam sealed to keep the rain out, and it features a long tail to protect you from wheel spray, while the external pockets are handy for stashing food. The sleeves have a three-layer fabric for comfort on the skin, while the inner textile layer is eliminated on the main body to save weight and keep the piece compact for packability. The downside is that the PU membrane means it isn’t as breathable as a Perfetto or Gabba, so this isn’t as good for long, steady medium-intensity rides. Oh, and keep in mind that it’s cut for a skin-tight fit on WorldTour riders – you’ve been warned.

READY IN CASE OF EMERGENCY

Just like the name says, we wanted to create the ideal simple jacket. We made it completely waterproof and compact, and, as you’d expect from Castelli, we also gave it an amazing on-bike fit, yet it’s still roomy enough to fit over a Gabbia. This jacket is an emergency piece, so we knew you wouldn’t want to break the bank with it, but the only real compromise compared to our top-of-the-line offerings is in breathability. We didn’t make this for an all-day rain ride, but it’s just right for your next emergency.

BLACK

LAYERING LIKE A PRO

We made this for Team Sky, for those rides when you need a bit of extra warmth when you head out in the morning or when you go down that long descent to do another interval. But knowing it’ll spend a lot of time in a jersey pocket, we made it as light and small as possible. It weighs just 81g (in size Large), about the weight of two gels, and takes up little more space than those two gels. The back is mesh while the front is a low-permeability woven poly fabric that keeps the wind off without letting moisture build up. No need to underdress ever again.

SUPERLIGHT PROTECTION

We put a lot of thought and engineering into our high-performance Superleggera Shell Jacket and Vest. The main body fabric is Japanese-made Pertex® Quantum, but we’ve made it without the standard coating so that you get a very small amount of air permeability that lets sweat escape, while the DWR coating will keep light rain at bay. On the back we’ve used a totally waterproof stretch panel that sheds wheel spray, and the stretch allows for a great close-to-body fit. Best of all, the piece takes up minimal space in a jersey pocket. The vest has mesh panels for extra breathability while the jacket is fully closed for extra protection.

RAIN OR SHINE
BIBTIGHT

Introducing Nano Flex Xtra Dry fabric. Eight years have passed since Castelli pioneered nanotechnology coatings in cycling clothing to provide a higher level of water protection without sacrificing breathability or stretch. We never stopped working on improving the fabric, and after numerous small improvements we’re ready with the first major update. The base fabric is a tighter-knit double-layer construction, and the water repellency treatment is improved to offer even more protection. We’re not quite there yet on our goal of bringing full waterproofness to a non-membrane fabric, but this is a significant improvement in making your foul-weather riding much more comfortable. This will also be your go-to tight for dry conditions. It’s a no-compromise piece for all your cool-weather riding. It’s not just about the fabric, though. This is a serious training tight, so it gets our Progetto X² Air seat pad. For total protection in the high-splash area of the inner leg, we use a fully reflective waterproof fabric that adds a high degree of nighttime safety to this tight. The tight is constructed with the bare minimum of seaming, which helps keep the rain out and also makes it more comfortable. This is the best all-around tight that we know how to make with today’s technology, but we’re still working to make it obsolete as soon as possible.

WE CALL IT
THE COLD AND WET SHORT

This is the piece designed for racing in the cold and/or wet. The new Nano Flex Xtra Dry fabric keeps out more water than ever and is warmer than ever thanks to the new double-face tightly knit construction. We’ve minimized seams for comfort and to keep water out, and used a raw edge at the bottom of the leg, cut just above the knee to add a bit of extra warmth. While this short is our best short for wet conditions, it’s also a great choice for dry and cold if you want to pair it with a knee or leg warmer.

RIDE THROUGH ANYTHING

In dry conditions our Nano Flex fabric is stretchy, breathable and warm thanks to its softly fleeced inner face. But in wet conditions the nanotechnology water-repellent surface keeps much of the moisture at bay. There is no membrane to block breathability, though, so in harder rain or on longer rides some moisture will come through. But that’s when this fabric is at its best: it never feels waterlogged, it almost feels dry on your legs and, best of all, it continues to keep you warm. If you’re going to do serious rain riding, you should look to our Nano Flex Pro 2 Bibtight, or even the Tempesta Pant, but for lighter rain, warmer temps or wet roads this will be ideal.

Lighter-weight bibtight for light winter conditions

Thermoflex fabric for exceptional warmth, stretch and breathability

Lower panel in Nano Light fabric for splash protection

Progetto X² Air seat pad for long-distance comfort

Mesh bib straps so that you can regulate insulation with your base layers, not the bib

Team Sky | Wout Poels

910
BLACK/ANTHRACITE

Winters are becoming less cold, and we wanted to create the right tight for cool conditions. The upper portion of this tight is very similar to our Omloop bibshort, but we’ve brought the thermal protection down over the front of the knee and added a lower panel in our water-repellent Nano Light fabric. The comfort on this tight is amazing, and it provides just enough warmth with full freedom of movement for your long adventure rides in the fall, or your early-season mild-temperature long base rides.

OMLOOP THERMAL BIBSHORT 4516520

PROGETTO X²

WEATHER CONDITIONS

- Thermal short cut just to the knee
- Thermoflex fabric for exceptional warmth, stretch and breathability
- Raw-cut edge at anatomically shaped knee
- Progetto X² Air seat pad for long-distance comfort
- Mesh bib straps so that you can regulate insulation with your base layers, not the bib
- Reflective viz strips for visibility

PRO INNOVATION

We first saw this back in 2009 when our Cervélo TestTeam rider Jeremy Hunt rode the Omloop Het Nieuwsblad in knee warmers that he had cut to knee length. It took six years for it to catch on, but we saw half a dozen or so riders starting the 2015 Omloop with that same look. So we engineered a fabric that lets us leave a soft raw edge at the back of the knee that won't cut into you, and we started riding prototypes. Once again the guys who do this for a living have come up with a new way to dress. It's significantly warmer than a thermal short but doesn't feel overdressed like a knicker.

- 3 rear pockets with reflective tabs

853
LIGHT BLACK/YELLOW FLUO

This no-fuss jersey is made to do exactly what a thermal jersey needs to do: keep you warm and dry. Our Warmer fabric is excellent for cool days thanks to the high-loft fleece inside and the exceptional wicking. This jersey works well on its own, or you can pair it up with a Perfetto Vest to go to colder conditions while keeping your core warm. We've paid attention to getting the details right, like the spacious rear pockets and the high collar with our Zen neck flap to prevent the easy-sliding YKK® zipper from rubbing on your neck.

BIBSHORT CHART

THE RIGHT SHORTS MAKE A DIFFERENCE

When it comes to performance cycling, whether it's long weekend rides, road races or granfondos, bibshorts are where it's at for outright comfort. A perfect pair of bibshorts will provide just the right balance of comfort and support for your legs when you're pounding out those kilometers.

PROGETTO X² SEAMLESS

Pro-level seat pad for maximum comfort. New seamless skin-care layer is softer against the skin and reduces abrasion. Separate saddle-shaped cushioning layer with progressive damping through high-density foam and gel inserts.

KISS^{AIR}²

High-performance seat pad for all conditions. Single-piece construction with infinitely variable thickness. Updated for 2019 with more supportive padding and a softer, stretchier fabric next to the skin.

FOUR DECADES OF EXPERTISE

Our lead product developer was 16 years old when she started her first job making buttonholes in the pockets of Castelli wool shorts in a factory just outside Milan. Soon she was stitching in the real leather chamois and would then go on to manage the factory. Maurizio Castelli noticed her attention to detail, and he hired her away from the contract factory to head up quality control inside Castelli. Finally, she moved up to lead product developer, a position she has held for more than 20 years.

The Premio 2 Bibshort is a direct result of Sonia's four decades of experience. There are the obvious things, like developing the right fabrics and knowing how to stitch in a seat pad. But those years of experience also led her to combine a new grip application to a raw-cut edge to make a leg ending that stays in place with no binding whatsoever. Then there is the rich texture and ideal stretch of the bib straps, and the flattering lines of the minimalist cuts. Working alongside Maurizio Castelli taught Sonia the value of constantly striving for perfection, attention to detail, and the art of bringing together craft and performance. That experience comes together in the Premio Bibshort.

FREE AERO 4 W

TYPICALLY, OUR WOMEN'S GARMENTS ARE DESIGNED FROM THE GROUND UP FOR WOMEN.

However, the Free Aero 4 W Bibshort is designed from the ground up for racing. That specific goal leads us to a somewhat minimalist construction, but one that is made for aerodynamics and also comfort, since racing requires long hours in the saddle, both in training and on race day, resulting in one of our most comfortable shorts as well.

THE 2019 FREE AERO 4 W BIBSHORT REPRESENTS A SIGNIFICANT EVOLUTION FROM LAST YEAR'S MODEL, OUR BEST-SELLING SHORT EVER. THERE'S A NEW LEG GRIPPER THAT STILL FEATURES A LIE-FLAT RAW-CUT EDGE BUT NOW HAS VERTICAL SILICONE STRIPES TO KEEP IT IN PLACE WITHOUT RESTRICTING STRETCH. THE NEW FABRIC ALLOWS FOR BETTER PRINT QUALITY FOR YOUR CUSTOM TEAM PRODUCTION, THE SAME AS TEAM SKY WILL USE IN 2019. WE'VE UPDATED THE SEAMS TO IMPROVE THE FIT AND MAKE THE SHORT LOOK EVEN BETTER ON THE BODY. WE'VE RE-ENGINEERED THE BIB STRAPS WITH NEW FABRICS AND CONSTRUCTION SO THEY STAY COOLER, LIE FLATTER AND ARE MORE DURABLE.

THE NEW FREE AERO 4 W BIBSHORT ALSO RECEIVES THE UPDATED PROGETTO X² AIR SEAMLESS SEAT PAD FEATURING THE SOFTEST SURFACE FABRIC YOU'VE EVER FELT IN A SEAT PAD.

SPEEDY ENDURANCE

We get a lot of requests for a mid-range performance short, and this one is special. Our Endurance Evolution fabric is a high-modulous very flat Lycra® fabric that feels extremely dry while giving just the right amount of compression. The waist construction eliminates stitching and elastic and lies completely flat. We use the GIRO3 leg band from our premium shorts and put in the freshly updated KISS Air² seat pad.

IT'S LIKE GETTING
A BIG HEAD START

This is Castelli's entry-level women's short but it's a shame to think of it that way. It could almost be a top-of-the-line short considering the components, fabrics and engineering that have gone into it. The seat pad is the women's-specific version of our Kiss Air² pad. The Pro Dry two-layer fabric has 15% polyester on the inside to help actively move moisture to the nylon outer layer. The 19% elastane/spandex provides excellent stretch, which together with the six-panel construction gives this short fantastic fit. We've concentrated on two critical places to improve comfort and applied our cross-wrap construction to the waist and leg endings for a softer and stretchier way to achieve a comfortable fit. On the leg endings, we've added reflective tape around the back for increased visibility. Maybe you should just think of it as a great deal on a top-level short.

WOMEN'S JERSEYS

AERO PRO W JERSEY FZ 4519046

SIZES: XS-XL	RACE FIT
WEIGHT: 131g (Small)	BREATHABILITY
15°-30°C / 59°-86°F	LIGHTWEIGHT

- CFD-based fabric placement and seam construction
- Engineered for aero efficiency at 30 to 55 km/h
- Airflow shoulder construction
- Velocity Rev2 fabric on front and sleeve
- 3D mesh back for Breathability
- Elbow-length stretch sleeves with raw-cut edge
- YKK® Vislon® zipper
- Drop tail allows perfect pocket placement while keeping jersey fitting well at waist
- Reflective piping

025
PINK

When Castelli engineered the first aero jersey for road racing back in 2006, everyone thought we were crazy. Back then, aero was only for TTs. Performance clothing meant moisture management. And you could win the Tour de France with a baggy jersey that was little more than a polyester T-shirt. Even our aerodynamic consultants expected limited gains, so we named the jersey Split Second, though, like now, we thought even small gains were worth pursuing. In the end the gains were pretty substantial, and we completely revolutionized the look of the pro peloton.

We’re now on the sixth major revision of our aero jersey. Each generation has become more aero and better fitting. The Aero Race W Jersey benefits heavily from CFD analysis of wake flow in the riding position for fabric and seam placement. It also benefits from pro riders’ feedback, as we’ve worked to make the jersey comfortable for their long hours of training and then racing in every possible weather condition.

It’s our most aero and most comfortable Aero Race Jersey yet. But we’re already working on an update.

THE NAME
CAN BE
MISLEADING

This jersey started life as a GERINGES Lightweight jersey to make climbing easier. But it turned out to be ideal for hot weather, and, surprisingly, it's very good in cool weather or even rain (under a vest or jacket) because it has absolutely minimal moisture absorption. The inner lining keeps it modest and adds a nice desgin detail to one of our most technical jerseys ever.

PROMESSA 2 JERSEY FZ 4517065
PROMESSA SLEEVELESS 4518091

SIZES: XS-XL	RACE FIT
WEIGHT: 109g (Small)	BREATHABILITY
18°-30°C / 64°-86°F	LIGHTWEIGHT

Engineered knit in polyester/Lycra® for excellent fit and moisture management
Limited-stretch back supports pockets even when fully loaded
Full-length YKK® Vislon® zipper
3 rear pockets plus zippered key pocket with reflective tape

070
DARK STEEL BLUE

CLEVERLY DISGUISED

The Promessa Jersey cleverly disguises extreme performance with design details that make people think you bought the jersey for the looks, not the tech. The engineered knit fabric allows us to make the front extra stretchy, while the back has limited stretch so that the pockets don't sag when you load them up. We knit in extra ventilation and subtle design details to balance technical features and sophisticated design.

CREATIVELY FAST

The Tabula Rasa Jersey can be thought of as our Aero Race Jersey, but in a cut made for everyday riding and with a few construction details that allow for maximum creativity in printing all over the jersey. It has reduced seaming and a simplified cut so that the graphic designers have maximum flexibility when adding a print to this jersey. But it doesn't skimp on details. The jersey features the same ProSecco Micromesh fabric that we use in the Giro d'Italia and Maratona dles Dolomites jerseys, and the same zipper and drop pocket construction found on Team Sky's race jerseys. Also available in our Servizio Corse custom clothing program, where you can add the graphics of your team, club, shop or company to Castelli's best products.

ALL-OVER PERFORMANCE

With the Tabula Rasa bibshort we set out to create a performance short that allows for all-over printing for maximum creativity in the graphic design. It had to be a no-compromise short, one that we would take for our longest rides. Along the way we found we still need a durable dyed nylon insert for the saddle contact areas but the rest of the short is all printable, but all performance as well. It features our ProFit Lycra® fabric for optimum compression along with our KISS Air² seat pad and Giro3 gripper elastic. Also available in our Servizio Corse custom clothing program, where you can add the graphics of your team, club, shop or company to Castelli's best products.

	LIGHTWEIGHT

Ideal for cool conditions when you need an extra layer under your jersey

100% polyester 3D mesh fabric

Reduced seaming at shoulders for extra comfort

Double layer construction at neck

DRY IS GOOD

This is the piece our pros requested for those inbetween conditions where the Prosecco R is too warm and the Pro Mesh is too cool, like Spain in February or Belgium in April. You're not looking for warmth from your base layer, just something to move the moisture away from your body and help your race jersey perform. Our 3D mesh fabric creates dead air space next to your skin, while the polyester capillary action moves sweat away.

Packs up small to easily store in jersey pocket

010
BLACK

UNBELIEVABLY
LIGHT

A jacket that weighs less than a jersey? Real GORE-TEX®, no less? And it packs up to fit in half a jersey pocket? And it's the most breathable GORE-TEX® ever? Hard to believe, but it's all true. This jacket is a game changer. It's fully waterproof, as you expect from GORE-TEX®, but with its exceptional breathability and packability you'll find that it replaces all your other shell jackets. If your ride has the slightest chance of rain or a long descent or the possibility of temperatures dropping, this jacket will automatically go in your pocket. You can confidently do longer rides in conditions that you would have avoided with all your old jackets. While you can get this fabric from other brands, you can't get the Castelli fit, design and construction.

EMERGENCY W JACKET 4517538

SIZES: XS-XL	WINDPROOFNESS
WEIGHT: 149g (Small)	WATERPROOFNESS
6°-15°C / 43°-59°F	INSULATION
	BREATHABILITY
	LIGHTWEIGHT
WEATHER CONDITIONS   	

Deluge Light 2.5-layer waterproof fabric keeps rain off with 10,000mm water column
Slight amount of stretch for excellent fit in riding position
Folds into half a jersey pocket for emergency situations
Innovative “gutters” drain water away from hands and off back
Waterproof zipper and seam sealing keep all water out

089
FOREST GRAY

READY IN CASE
OF EMERGENCY

Just like the name says, we wanted to create the ideal simple emergency rain jacket. We made it completely waterproof and compact, and, as you'd expect from Castelli, we also gave it an amazing on-bike fit, yet it's still roomy enough to fit over a Gabba. This jacket is an emergency piece, so we knew you wouldn't want to break the bank with it, but the only real compromise compared to our top-of-the-line offerings is in breathability. We didn't make this for an all-day rain ride, but it's just right for your next emergency.

LAYERING LIKE A PRO

We made this for Team Sky, for those rides when you need a bit of extra warmth when you head out in the morning or when you go down that long descent to do another interval. But knowing it'll spend a lot of time in a jersey pocket, we made it as light and small as possible. It weighs just 66g (in size Small), about the Lightweight of two gels, and takes up little more space than those two gels. The back is mesh while the front is a low-permeability woven poly fabric that keeps the wind off without letting moisture build up. No need to underdress ever again.

MEN'S TRIATHLON

Marino Vanhoenacker

IT SHOULDN'T BE A SURPRISE

When we originally designed the T1:Stealth top we imagined it being put on in T1 and coming off in T2. Then we saw swimming and running in it. Marino Vanhoenacker was the first one to ask for a Sanremo style suit with the T1:Stealth upper part. He helped us work through the development phase, then debuted it at IM Kagenfurt for his 8th victory in that race. This suit is no-compromise speed equipment. It's not the most flexible for the swim, nor the coolest in the run. But if all-out speed is what you want, then you want this suit.

FOR OLYMPIC
TO IRONMAN DISTANCES

We made this suit to be compliant with ITU rules but with the fabrics, aerodynamics and cargo-carrying capacity to be ideal for 70.3 races, and even to win the odd Ironman World Championships, like Fred Van Lierde did in this suit in 2013. It has the fabrics, the pockets and the KISS Tri seat pad of our Free long-distance race suits to offer exceptional performance in a wide variety of races.

QUEEN K AND
WIND TUNNEL TESTED!

Aerodynamic race shirt to reduce aero drag for the bike leg.
We created this top to shorten your bike leg. And wind tunnel testing shows that an Ironman bike leg will go by almost 6 minutes quicker compared at our sleeveless Free top. The second generation now fits even better and includes updated pocket designs for easier access and a new waist to stay flatter and even more aero.

LINEA PELLE

LINEA PELLE COMBO PACK 8800103

All three Linea Pelle products delivered in a mesh drawstring bag.

001

001

CHAMOIS DRY LUBE 8800100

Moist skin is softer and more susceptible to abrasion, as any rider who has done a long race in the rain can attest. Our dry lube reduces friction without weakening the skin through moisturizers. We also use 100% natural tea tree oil for antibacterial and antimicrobial properties to help prevent infections and saddle sores.

001

FOUL WEATHER CREAM 8800102

This cream is designed to protect your skin from wet, dirty conditions. It is not petroleum based and won't damage the fabric of your bike shorts. It is also easier to clean off with soap and warm water.

001

WARMING EMBRO CREAM 8800101

This cream creates a warming sensation that helps “wake up” muscles on cooler days or can also help relieve sore muscles. We used mostly natural ingredients to create a strong warming sensation but without the burning feeling that you get with some products. This cream can be used underneath the Foul Weather Cream for racing in cold and wet conditions.

RACE BAGS

ROLLING TRAVEL BAG XL 8900101

SIZE: 40 x 74 x 29cm CAPACITY: 80 LITER

- Water and stain resistant materials
- Semi rigid bottom for support and protection
- Moulded botom skid plates
- Low density wheels
- Telescoping handle
- Internal laptop sleeve
- 2 main compartments
- Front and top carry handles
- Multiple internal pockets
- Fleece lined electronics pocket
- ID window
- Reflective accents

010
BLACK

ROLLING TRAVEL BAG 8900100

SIZE CHARTS

AT CASTELLI, WE OBSESSIVELY TEST AND REFINE TO GIVE YOU THE BEST FITTING, HIGHEST PERFORMANCE CYCLING APPAREL.

01.

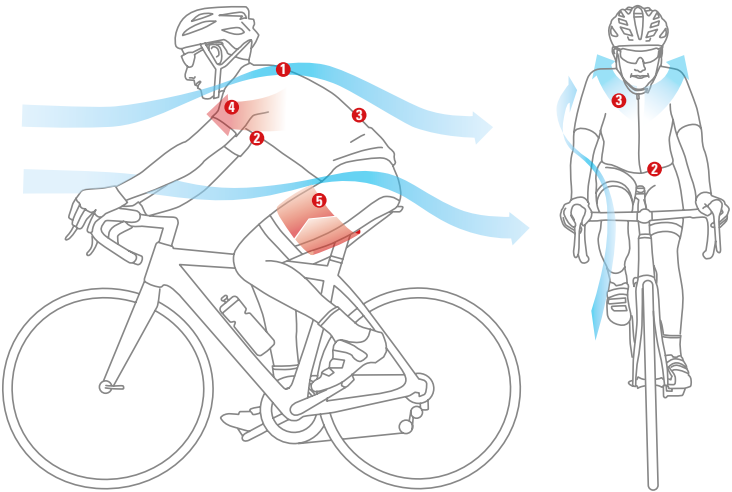

On the bike, your Castelli jersey should fit close to the skin.
02.

Off the bike, your Castelli jersey might feel tight across the chest and a little short in front.
03.

Castelli ProSecco treatment helps perspiration evaporate quickly to keep you cooler and drier.
04.

Castelli jerseys are designed with the sleeves articulated forward for maximum aerodynamic performance.
05.

Bibshorts should fit tightly enough to support critical leg muscles through compression without inhibiting movement and constricting blood flow.

CYCLING PADS

PROGETTO X² S E A M L E S S

The Progetto X² Air Seamless seat pad is used to protect your skin while providing just the right level of padding for maximum comfort, no matter how long your epic ride is.

01. SKIN CARE LAYER

A four-way stretch microfiber top layer offers maximum softness and moves with your body to prevent skin irritation. Seamless construction prevents chafing. Perforated foam backing allows airflow to aid evaporation.

02. SEAMLESS INTEGRATED TECHNOLOGY CUSHIONING LAYER

A separate component provides no-compromise cushioning, with Castelli's infinitely variable thickness to bring the right shape to the right part of the body: thicker under the sit bones and thinner on the sides and under the perineum.

03. VISCIOUS COMFORT INSERTS

Perforated viscous padding is added under the highly sensitive ischial and perineum pressure areas.

KISS^{air}²

A new improved shape, higher-density foam and a softer top fabric make the KISS pad more comfortable than ever.

01. SEAMLESS SKIN CARE LAYER

The softest-ever fabric next to your skin for immediate and long-lasting comfort. Seamlessly engineered to reduce chafing and abrasion. Stretchy to move with you.

02. DUAL DENSITY, INFINITELY VARIABLE THICKNESS

Dual-density infinitely variable thickness gives you the perfect cushioning in every part of the pad. Maximum thickness and density in the ischial zone, tapering to moderate thickness under the perineum and minimum thickness at the perimeter.

03. ANATOMICAL SHAPE

Comfort is further enhanced by the creation of a perfect interface to your body during every pedal stroke.

TRIATHLON
PAD

KISS^{TRI}

Multi-density KISS TRI-pad foam is optimized for aerobar position on the bike, and practically disappears during the swim and run.

01.
SEAMLESS SKIN
CARE LAYER

A super soft, brushed microfiber top that maximizes comfort and fit. Seamlessly engineered to eliminate chafing and abrasion. Flexible to move with you. Bacteriostatic treatment to avoid saddle sores and infection.

02.
MULTI
DENSITY
FOAM

Specifically designed for the triathlete. Minimum bulk doesn't get in the way during the swim and run legs. Extra fast drying foam prevents chafing on the bike.
